

Brightleaf Analytics - Company Profile

This is a fictional sample document created for testing a RAG pipeline.

1. Company Overview

Brightleaf Analytics Pvt. Ltd. is a business-to-business software company. It was founded in March 2016 in Pune, India, by Asha Menon, who serves as Chief Executive Officer (CEO), and Ravi Kulkarni, who serves as Chief Technology Officer (CTO).

The company headquarters is on the 4th floor of Riverside Tech Park, Pune. Brightleaf also operates offices in Bengaluru, India, and Singapore. The Singapore office opened in 2021.

As of January 2025, Brightleaf Analytics employs 240 people and serves customers in 18 countries, mainly mid-sized retail and consumer-goods businesses.

2. Products

LeafSight is the flagship product. It is a retail demand-forecasting platform that predicts store-level product demand up to 12 weeks ahead using sales history, promotions and local holiday calendars.

LeafPulse is the second product, launched in 2022. It is a customer-sentiment dashboard that analyses product reviews and support tickets.

3. LeafSight Pricing Plans

LeafSight is sold as a subscription in three plans. Prices are in US dollars.

Starter plan: US\$49 per user per month. Up to 10 users, email support only, and 1 data-source integration.

Growth plan: US\$99 per user per month. Up to 100 users, email and live-chat support, and up to 10 data-source integrations.

Enterprise plan: custom pricing, with a minimum of 50 users. Includes unlimited integrations, 24/7 phone support and a dedicated customer success manager. Phone support is available only on the Enterprise plan.

Customers who choose annual billing instead of monthly billing receive a 15% discount on the Starter and Growth plans.

A 14-day free trial of the Growth plan is available. No credit card is required to start the trial.
