

Brightleaf Analytics - Customer Support, SLA and Refund Policy

This is a fictional sample document created for testing a RAG pipeline.

1. Support Channels

Customers can contact support by email at support@brightleaf.example and through live chat in the LeafSight application. Phone support is available only to Enterprise plan customers, 24 hours a day, 7 days a week.

2. Uptime Commitment and Service Credits

Brightleaf commits to 99.9% monthly uptime for the LeafSight platform. If monthly uptime falls below this commitment, customers are eligible for service credits on that month's subscription fee:

- Uptime from 99.0% up to (but not including) 99.9%: 10% service credit.
- Uptime from 95.0% up to (but not including) 99.0%: 25% service credit.
- Uptime below 95.0%: 50% service credit.

Service credits must be requested within 30 days after the end of the affected month.

3. Incident Priorities and Response Times

- Priority 1 (P1), platform down: first response within 1 hour, 24/7.
- Priority 2 (P2), major feature impaired: first response within 4 business hours.
- Priority 3 (P3), minor issue: first response within 1 business day.
- Priority 4 (P4), general question: first response within 3 business days.

4. Cancellation and Refunds

Monthly subscriptions can be cancelled at any time. The cancellation takes effect at the end of the current billing month. Monthly subscription fees are not refundable.

Annual subscriptions receive a full refund if they are cancelled within 30 days of purchase. Annual subscriptions cancelled after 30 days are not refunded, but the service remains active until the end of the paid annual term.

Approved refunds are processed within 10 business days to the original payment method.

5. Data Retention After Cancellation

After a subscription ends, customer data is retained for 60 days, during which the customer can export it. After 60 days the data is permanently deleted.

6. Price Changes

Brightleaf gives customers at least 45 days of written notice before any price change takes effect.
